

I used a real pixel scale image to figure out the positions and sizes of the shapes.

400 pixels

This image is 400x400 pixels

Shape blocking
from an
reference
image to
get the rough
shaping

Eyes

Mouth

Head

Body

Cookie Monster Sketch

The head and body, separately,
will move towards the mouse when it
is panned to create a moving effect.

- Body will have a lower sensitivity

Pupils of the eyes will follow the mouse

- Find the normal between the eye center
and the mouse position and clamp it to stay
inside the eye. (Something like that I think)

Cookie!
Centered around
Mouse x, y
30 radius

Not drawn but the closed mouth
is just the "Mouth Cover" shape but offset
downwards and (Color.Black)
